

DISHWASH DETERGENT

OVERVIEW:

Hard water machine dishwasher detergent is formulated to effectively clean dishes and glassware in hard water areas.

COMPOSITION

Contains sodium hydroxide;
caustic soda

CHEMICAL PROPERTIES

Density (20 °C): 1.12 g/ml
pH-value (1%): >11.5

FEATURES AND BENEFITS:

- A heavy-duty liquid machine detergent suitable for use in both single and multi-tank dishwashers
- Optimal blend of caustic alkalis and scale controlling agents that will provide excellent soil removal of fats and dried on food.
- Can be automatically dosed and controlled by conductivity, ensuring consistent delivery of product and reproducible cleaning results.
- The powerful scale control agents prevent scaling in medium/hard water conditions.
- Effectively cuts through grease and dried-on food.

INSTRUCTIONS FOR USE:

For automatic dosing only.

Recommended Dosage:

1.0 – 4.0ml/litre hot water at 60 –65oC.

LEGISLATION

The classification, labelling, and safety measures are defined according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2015/830. This legislation governs the registration, evaluation, authorization, and restriction of chemicals, ensuring their safe use in the European Union.

STORAGE & TRANSPORT:

Store in original container. Avoid extremes of temperature.
